

11-19 Dot and Numeral Cards

Print the cards on cardstock. Laminate, cut out and store in a zip-lock bag. Students can:

- match dot cards with numeral cards
- order cards from least to greatest/greatest to least
- place cards facedown in two rows and play Memory with a partner .

You may wish to consider:

- printing the dot and numeral cards on different colored card. Alternatively, put a large ● on the back of the dot cards so that students can differentiate between dot and numeral cards when the cards are facedown.
- placing blank paper and markers in the center for students who wish to record their work.
